

This is in support of the ban on unsolicited faxes. My fax is used for two business jointly, and thus affects both. We've had critical faxes delayed due to junk faxes tying up the line and using up all our paper, causing errors. The fax marketers will argue this infringes on their right to do business; but their faxes infringe on MY right and ability to do business. Their rights cannot supersede mine, as we are all afforded equal protection. Thank you.
